Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.	Applicant(s)	
	10/574,472	UENO ET AL.	
	Examiner	Art Unit	
	Liam J. Heincer	1796	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 31 October 2008.
- 2a) This action is **FINAL**. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1 and 3-6 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1 and 3-6 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on October 31, 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of application 11/588,293 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 103

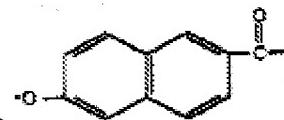

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

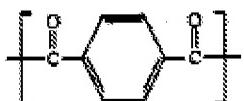

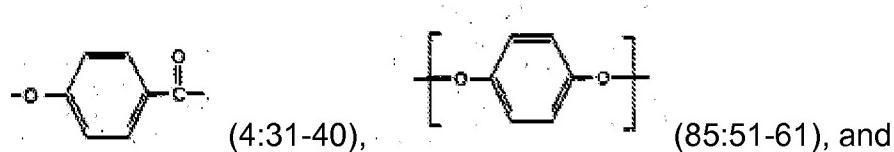

Claims 1 and 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Calundann (US Pat. 4,219,461).

Considering Claims 1, 3, and 4: Calundann teaches a liquid crystalline polyester resin

consisting essentially of repeat units of the formulas (3:53-65),

Art Unit: 1796

(6:47-56); where the ratio of p/q is ~0.7 in the most preferred embodiment (4:25-30 and 4:65-5:2). Calundann also teaches the amount of units of the dihydroxy and dicarboxylic acid moieties as being from 5 to 30 mole percent (3:17-22). Also, Calundann teaches the amount of the hydroxyl benzoic acid moiety as preferably being 35 mole percent (4:65-5:2).

Calundann teaches the amount of the hydroxyl naphthalenic acid moieties as being from 20 to 40 mole percent. While the preferred embodiments disclosed in Calundann do not fall within the claimed range, the disclosed range provides substantial overlap with the claimed range, providing a *prima facie* case of obviousness for the claimed range. See MPEP § 2144.05.

Calundann does not disclose the claimed melting point. However, the mere recognition of latent properties in the prior art does not render nonobvious an otherwise known invention. *In re Wiseman*, 596 F.2d 1019, 201 USPQ 658 (CCPA 1979). See MPEP § 2145. Although, Calundann in fact discloses a different melting point for their polymers (3:37-40) it is unclear what procedure is used in determining this value. As the procedure used to determine the melting point can lead to significantly different measurements for identical samples, it is up to the applicant to show that the polymer disclosed in modified Calundann would possess a different melting point than claimed when subjected to the testing conditions disclosed in the original specification (¶0035).

Considering Claims 5 and 6: Calundann teaches resin as being used in a molding composition comprising 1 to 60 percent/1-150 parts of glass fibers or talc (9:48-52).

Response to Arguments

Applicant's arguments filed September 4, 2008 have been fully considered but they are not persuasive, because:

Applicants argument that Caldunnan teaches a higher melting temperature is not persuasive. Although, Calundann in fact discloses a different melting point for their polymers (3:37-40) it is unclear what procedure is used in determining this value. As the procedure used to determine the melting point can lead to significantly different measurements for identical samples, it is up to the applicant to show that the polymer disclosed in modified Calundann would posses a different melting point than claimed when subjected to the testing conditions disclosed in the original specification (¶0035).

As discussed in the rejection above, the mere recognition of latent properties in the prior art does not render nonobvious an otherwise known invention. *In re Wiseman*, 596 F.2d 1019, 201 USPQ 658 (CCPA 1979). See MPEP § 2145. The applicant has indicated in the original specification that using the claimed ratio of monomers is the “means for solving the problems” of high molding temperatures in LCP (¶0006) and has provided no evidence that a specific method of making is required to obtain the claimed properties (¶0026). As Calundann renders each of the ranges obvious as shown above, the fact that the applicant has recognized that the combination of ranges provides a low melting point is not sufficient to render the invention nonobvious. The applicant would be required to show that the property was unexpectedly achieved in order to rebut the *prima facie* case of obviousness.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Liam J. Heincer whose telephone number is 571-270-3297. The examiner can normally be reached on Monday thru Friday 7:30 to 5:00 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Eashoo can be reached on 571-272-1197. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
